Champagne

The Champagne wine region is a historic province within the administrative province of Champagne in the northeast of France. EU law and the laws of most countries reserve the term "Champagne" exclusively for wines that come from this region. The primary grapes used in the production of Champagne are Pinot Noir, Chardonnay and Pinot Meunier. The high altitude and cool temperatures of the area serve to produce high levels of acidity in the resulting grape which is ideal for sparkling wine. Due to the gentle pressing of the grapes and absence of skin contact during fermentation, the dark-skinned varieties also yield a white wine. Rosé Champagne is produced either by leaving the clear juice of black grapes to macerate on its skins for a brief time or by adding a small amount of still Pinot noir red wine to the sparkling wine cuvee.

Chassenay Cuvée Première NV

This Champagne is composed of 60% Pinot Noir and 40% Chardonnay and is matured in cellar for 3 years. It has a gold lemon colour with beautifully fine bubbles and on the nose there are spicy and floral notes with hints of honey and yellow fruits. This cuvée made it into the top 10 non-vintage sparkling wines in the world at the Effervescents du Monde awards in 2009.

Gold & 2 Silver Medals & IWC Bronze 2011

Chassenay Millésime 2005

Created exclusively from one intense harvest and comprised of 60% Pinot Noir grapes and 40% Chardonnay the beautiful pale gold colour is dotted with vivid and generous bubbles. On the nose an elegant bouquet of citrus fruits and white flowers is revealed, with notes of toasted hazelnuts. On the palate there is a hint of mineral notes balanced with a nice structure of yellow fruits. The Vintage matures in cellar for 5 years and after disgorging it settles at least 3 months in cellar.

We say, "A top quality Vintage Champagne for great value. Great on its own or with gazpacho, dover sole, red mullet and prawns."

DOCa. Priorat

Created by the Doix & Llagostera family in 1998; it is the reinitiation of a tradition that began in 1850. The gold medal obtained in the Universal Exhibition of Barcelona in 1888 and the silver medal won in the Universal Exhibition of Paris in 1878, are a reminder of the passion with which Juan Extrems Doix, Juan Doix's grandfather, used long ago to look after the vineyards and produce his wines. After the phylloxera outbreak the vineyard was replanted with Garnacha and Cariñena varieties, native to the Priorat region, thereby maintaining the growth of the vineyards. Nowadays, the family labours with love and passion for the fruit grown in their hundred-year-old vineyards so they can produce their widely acclaimed and highly celebrated wines.

Founder Anders Vinding-Diers of Bodega de Mirabel worked a few years with his cousin Peter Sisseck the maker of Pingus and Hacienda Monasterio in Ribera del Duero. Over these vintages Anders helped his cousin Peter who introduced him to Biodynamic agriculture and fine wine making. Anders describes his wine making philosophy as quite simple... "My method is to work a lot in the vineyard, I don't use any pesticides, my aim is to be 100% ecological, and in the cellar just listen to the wine and not touch it unless it needs a bit of help" and this approach enables him to produce a truly magnificent wine. Bodega de Mirabel is situated in the wine producing region of Extremadura in the South-West of the country which some have said is the Napa Valley of Spain...!
